

WorkForce A4 business inkjet printers

Lead the charge for a better future

Smarter. Greener. Faster

EPSON
EXCEED YOUR VISION

Revolutionary A4 single and multi-function business printers

These WorkForce business inkjet printers combine ultra high-quality colour output with ultra-low energy consumption that only inkjet can offer.

These environmentally smart business printers are capable of delivering superb print quality at 4800 x 1200 dpi, and high capacity DURABrite Pro ink cartridges deliver more printed pages from fewer supplies to help reduce your cost of printing.

Epson's advanced PrecisionCore Heat-Free technology has the flexibility required to make WorkForce possible, thanks to its use of liquid ink. This promotes space-saving supplies, low power consumption* and reduces environmental impact.

WorkForce business printers: Where quality meets efficiency

Lower power consumption
(Average up to 25 watts,
or 87% less than laser*)

High capacity ink cartridges
Black up to 50,000 pages
Colour up to 20,000 pages†

No heat printing
process ideal for
labels and envelopes

High print quality up
to 4800 x 1200 dpi

4.3-inch colour touch
panel display on MFPs

High speed dual scan
(Simplex/duplex: up to 60 ipm†)

Efficiency champion

Reduce the environmental impact of print with a Heat-Free solution that uses fewer supplies, without affecting output quality.

The WorkForce range uses up to 87% less energy* when printing compared to an average laser printer. It not only lowers electricity costs, but also requires fewer supplies. The simple printing process and high page yield inks reduce downtime, keeping your business productive.

With low waste production and few maintenance parts, you are not only benefiting from a printer that generates less electricity when printing, but also reduces CO₂ emissions. Power, efficiency and speed come together in a space saving design, making it easy to locate conveniently in your office.

Complex technology using **heat** and **pressure**

Simple cool, contactless technology

Epson PrecisionCore print technology uses no heat in the printing process, saving up to 87%* in printer-related electricity costs compared to laser printers, and at the same time reducing CO₂ emissions. You can find out exactly how much by using our on-line calculator:

www.epson.com.au/eco-savings

By eliminating fusers, drums and developers from the printing process, Epson reduces the amount of consumables sent to landfill. It also reduces user intervention, maximises uptime and boosts staff productivity.

Advanced integration improves workflow

Take advantage of remote management, customise your print options and enjoy seamless compatibility with a wide range of tools and software that can be integrated into your existing IT infrastructure to improve productivity and increase efficiency.

Epson Print Admin

Boost productivity and monitor print usage via a server-based solution that creates a secure printing, scanning and copying environment through user-authentication.

Epson Device Admin

Control, analyse and manage your printer fleet centrally from one intuitive interface, designed to increase productivity and reduce costs.

Mobile and cloud printing

Turn your tablet or smartphone into a powerful office assistant. Epson's mobile and cloud printing services allow you to print and scan wirelessly³ using smartphones and tablets in the office and on the go.

Epson Remote Services (ERS)

ERS is Epson's remote monitoring tool to enable simple and efficient management of a printer fleet. Use this cloud-based service to access device details via a convenient dashboard and receive advance diagnosis of issues for maximum uptime.

Document Capture Pro

The WorkForce Enterprise range of printers are Document Capture Pro compatible, making it easy to seamlessly and locally manage documents. Document Capture Pro integrates into document management and cloud storage systems, enabling you to capture, enhance, edit and distribute scanned documents effectively throughout your business.

Epson Open Platform (EOP)

Gain complete control of your printing operations via a range of partner solutions, such as PaperCut®, that enable you to adapt the WorkForce Enterprise range of printers to meet specific and changing business requirements. All these solutions help you better manage your office printing.

Epson Innovation and Design

Designed for Productivity

What's better, a few big copiers or one fast central copier and several smaller devices? It really boils down to two things – how far the copiers are located from your staff, and the cost-effectiveness of the smaller devices. The new range of Epson A4 devices is designed with a compact footprint and low cost of ownership so you can place them close to workgroups, and increase staff productivity without impacting your overall cost of printing.

Designed for Business

PrecisionCore inkjet printing technology is at the heart of the range of Epson business printers. It enables a wide range of features specifically designed for business – compact design, front paper exit for easy access, zero second warm-up time so there's no waiting for staff or customers, and no-heat printing, which allows devices to be located in tight spaces without the threat of overheating or overpowering ozone.

The size of your business – small, medium or large – or your type of business – retail, education, hospitality, legal, finance – doesn't matter. Epson's range of A4 printers is designed to help your business grow.

Designed for Flexibility

Flexibility is not usually a word associated with office printing but Epson has designed flexibility into their range of business printers. One moment they can be great general office printers helping drive productivity and lower your business costs, the next they can be producing high quality sales and marketing collateral that will blow you and, more importantly, your prospective customers away. You no longer need to print brochures in bulk at a local print shop; print them in-house and on-demand to preserve cashflow.

And if that's not enough, the Epson WorkForce printers also print on labels and envelopes, making them the perfect all-rounders.

Model number	Epson WorkForce Pro WF-M5299	Epson WorkForce Pro WF-M5799
Single or multi-function, mono or colour	Single-function mono	Multi-function mono
Print method / max resolution	PrecisionCore™ / 4800 x 1200 dpi	PrecisionCore™ / 4800 x 1200 dpi

Scanner features	n/a	Scan to PC via Document Capture Pro, Cloud ⁹ (inc email), network folder, memory device, password protect PDFs
Faxing modem	n/a	33.6 Kbps, as fast as 3 sec per page
Memory / speed dials / PC fax	n/a	up to 550 pages / max 200 / PC Fax

1 ISO mono, colour print speeds are measured in accordance with ISO/IEC 24711/24712/24734/29183. Actual print times may vary on factors including system configuration, software, and page complexity.
2 Monthly duty cycle up to 45,000 is the highest volume a user could expect in one month, it is not recommended that the device be run consistently at these volumes. For best device performance, run the device at the recommended duty cycle.
3 Not all media types are supported for PCL printing.
4 Wi-Fi CERTIFIED™; level of performance subject to the range of the router being used. Wi-Fi Direct may require printer software.
5 Most features require an internet connection to the printer, as well as an internet-and/or email-enabled device.

6 Only printing is supported under Windows Server OS.

7 Some applications and/or functions may not be supported under Mac OS X.

8 Replacement ink yields are estimated on ISO/IEC 24711 test in Default Mode printed continuously. Ink yields may vary for reasons including images printed, print settings, temperature and humidity. Yields may be lower.

9 Scan to cloud requires an internet connection, a free Epson Connect account and a destination email address or cloud storage account.

* Epson WorkForce Pro max power consumption of 25 watts is 87% less than the average of 33 A4 counterpart 21-44 ppm models available in the Australian market as at 1 February 2021 based on manufacturers' own specifications

† Ink yields for WF-C539R and WF-C589R models

‡ Dual scan speed of 60 images per minute for WF-C579R model
